

ALVES AUTOMATIC PAPER CUTTER

12" MODEL J
Patent applied for

CUT STRIP PROCESS PAPER FASTER, AUTOMATICALLY AT LOW COST

Automate cutting of material reproduced on rolls from Xerox, Diazo, Ozalid, Photostat, Photography and similar processes. Alves automatic paper cutters increase production and reduce overhead in this normally tedious, time consuming, manual operation. Rugged construction gives years of trouble-free service.

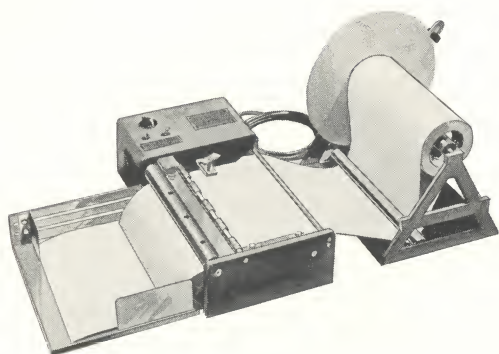

- Completely automatic feeding and cutting
- Handles paper widths from 2 to 24"
- Feeds and cuts at speeds to 40' per minute
- Cuts rolls into sheets of any length from 1" minimum
- Accommodates paper stock in weights from 15 to 120 lbs.
- Unique rotary knife provides safe operation

Alves paper cutters have been performance proven in banks, insurance companies, photo processing, government agencies and in other applications where original documents are reproduced on processed rolls of paper.

Write or call today for a demonstration of how Alves paper cutter can save money for you.

12" MODEL J
Fully Automatic — Completely Transistorized

Accommodates paper in widths from 2 to 12 inches. Feeds paper at speeds up to 40 feet per minute. Cuts any desired length from a minimum of 1 inch. Handles paper stock in weights from 15 to 120 lbs. Complete with paper roll stand and collector tray for cut paper. Paper roll stand takes rolls up to 13 inches in diameter.

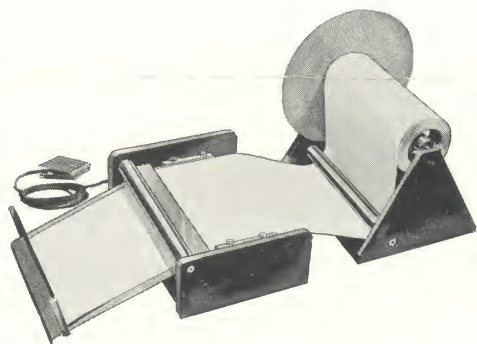

110-120 volt, 60 cycle, AC.

24" MODEL L
Fully Automatic — Completely Transistorized

For wider paper in widths from 8 to 24 inches. Feeds paper at speeds up to 40 feet per minute. Cuts any desired length from a minimum of 1 inch. Handles paper stock in weights from 15 to 120 lbs. Complete with paper roll stand and collector tray for cut paper. Paper roll stand takes rolls up to 13 inches in diameter.

110-120 volt, 60 cycle, AC.

12" MODEL M
Semi-Automatic — Low Cost

Ideal for applications where high speed paper cutting is not required. Handles paper widths from 2 to 12 inches inclusive and paper stock in weights from 15 to 120 lbs. Paper is hand fed to this model. The cutting blade is actuated by an electric foot switch. Speed of paper feeding is commensurate with operator's ability. Complete with paper roll stand and collector tray for cut paper.

110-120 volt, 60 cycle, AC.

Mr. T. Nelson, Sys. Consultant
Box 1546
Poughkeepsie, New York

Dear Mr. Nelson:

Thank you for your recent inquiry regarding our line of automatic and semi-automatic print cutting machinery.

For over fifteen years, we at Alves have been manufacturing cutting machinery to reduce labor involved in cutting individual prints from material produced in roll form. We have hundreds of machines in service all over the world.

It has become apparent to us that there are many variations in the work being generated by our machine users, so a discussion of how our equipment might be employed in any instance is dependent on our having some information about the specific problem. If you will please forward to us a brief description of your photo-reproduction operation, and/or a sample of the material which you wish to cut, we can more intelligently recommend the specific model of our equipment best suited for your purposes.

We are enclosing a brochure which briefly describes our Model J, and other models available to meet other needs.

We look forward to receiving information about your specific problem. Please be assured of our continued interest and cooperation.

Very truly yours,

ALVES PHOTO SERVICE, INC.

A handwritten signature in blue ink that reads 'Richard A. Lee'. The signature is written in a cursive style with a small 'r' at the end.
